NO IRRITATION.

THE PROCTER & GAMBLE CO., CHICAGO.

Seed oats at Schwab's.

Get your seed oats at Schwab's.

Circuit Court the 4th Monday.

If in need of seed oats see Schwab.

A. C. Moore's little boy has died yesterday.

An infant of Jake Baker's died yesterday.

Marion will be well represented at Sturgis tomorrow.

Be sure to hear Col. Ham's lecture Monday night.

We will back the ground hog against Hicks or Foster.

Dr. R. L. Moore is spoken of as a candidate for County Judge.

Sam Gugenheim was in Hopkinsville the first of the week.

What few men who are not candidates are selling school supplies.

Some repairs are being made in the Masonic lodge room at this place.

It is reported that there was a case of small-pox in Princeton Sunday.

Don't forget the famous Banghart Bros smokers, Thomas Bros sold.

Ed Hill's wife, near A. Woodall's, is dangerously ill with puerperal fever.

The Spring term of the Marion Academy opened Monday with flattering prospects.

H. A. Hodge spent last week in the Shady Grove neighborhood writing insurance.

Providence willing, there will be some tobacco grown in this county this year.

J. R. McIntire has sold his residence in East Marion to J. W. Wallace and will build another.

The Democratic waters are still placid; not enough candidates in the pool to create the slightest ripple.

D. H. Frauks is making a success as landlord of the Planter's House, the biggest hotel in Owensboro.

Mr. R. E. Bigham thinks favorably of the electric light plant, and may take hold of the enterprise.

Monday help was being solicited in town for Mr. Bennett, a blind man living a few miles from town. He is a deserving, needy man.

Messrs A. J. Pickens and Dick Mays went to St. Louis Monday. They expect to purchase a car load of mules and bring to this county for sale.

Salem has swung her by-laws to the breeze; the enactments of the Board of town directors are somewhat similar to those of Marion. Our neighbor has a real lock-up, too.

The old school buildings are offered for sale. Marion has outgrown her shabby clothes and proposes to put on a smart frock. You can't keep a good town down.

The man who was seen to take my meerschaum pipe from Pierce & Sons store, will save trouble in court, by returning it, and no questions will be asked.

Why not use the best snuff? It protects the teeth while other snuff ruins them. Each box of Bruton's snuff contains a ticket which when you get enough of them, will get you a piece of fine 18 karat jewelry. For sale by Thomas Bros.

For the school year ending June 30, 1894, the public school money Crittenden county draws amounts to white, \$13,487.63; colored \$1,297.61, making a total of \$14,785.24. There are now eight colored school districts, No. 9 having been merged into No. 6.

"There is a decided lull in our business," remarked the county judge a few weeks since, as the county attorney nodded an assent. "We are having very few Commonwealth trials now, compared with other seasons of the year." When asked how the seasons affected that particular work of the officials, the reply was that during the barbecue season, in the late summer and early fall months, the "boys" had their fun. These gatherings gave rise to a very large per cent. of the troubles out of which grow the catalogue of offenses that come before the courts for trial. The change of the election from August to November has diminished the number of barbecues, and consequently decreased the gatherings that breed trouble.

Children Cry for Pitcher's Castoria.

#### A Lecture Club.

An effort is being made to organize a permanent Lecture Club at Marion. The object is to unite a sufficient number of those who are desirous of hearing the best lecture talent of the country, that the necessary funds may be guaranteed in advance. This done there will be no trouble in getting the men who are instructing and delighting the country from the platform. Col. Ham, the Southern Orator and Humorist, has been selected to deliver the first lecture of the series at the Opera House next Monday night. The opportunities of the people of Marion for hearing such men as Col. Ham, Rev. Lyman Abbott, D. D., Col. G. W. Bain, Will C. Carleton, Rev. Sam P. Jones, Eli Perkins, James Whitcomb Riley and a score or more of others so well known, has been very limited; the organization of the club will afford the best of opportunities. Go out Monday night; you will get many times the worth of your money, and will encourage the organization of the club.

#### A Fine Church.

The magnificent new temple of worship built by the Baptist congregation of this city was opened Sunday for the first time and services held therein. Notwithstanding the fact that there was a hard snow falling and Mother Earth was covered to a depth to make walking disagreeable, there was a very large congregation present.

The stone foundation was built by the Morris-Bennett Company, of Louisville, and cost \$2,500. Contract for the brick and woodwork, including roof, in fact the delivery of its keys at its completion, was let to Riley and Koerner for \$16,000.

There is yet due on the building near \$9,000, but this amount will be easily raised. A call was made upon the congregation Sunday morning, and, with but little persuasion, \$4,647 of this sum was subscribed.—Henderson Gleaner.

#### A Card.

I take this method of announcing to the public that I have yielded to the solicitations of many partial friends and have also succumbed to my own inclinations in the matter of becoming a candidate for the office of Jailer of Crittenden county. And while I do not regard this as a political office, and believe that a man's politics would or should have nothing to do with the discharge of the duties of the same, still, right or wrong, take it the country over, you will find that electors, many of them will want to know of what political persuasion is the candidate. And though politically in the minority in this county—I am subject to the will of that party, expressed in such a manner as they may decide upon, and hereby pledge myself to abide their action and support the man of their choice, with this proviso, I don't expect to vote for myself. Arthur H. Belt.

#### The Snugglygoster.

Columbus Enquirer: Col. Ham has had remarkable success since he took to the platform. He has drawn large audiences and has entertained them. As the discoverer of the Snugglygoster, Col. Ham won fame rapidly and has gone up the ladder with a bound.

His opening remarks were pregnant with wit and humor, and then something reminded him of a story. Well, that story was a sidesplitter, and the audience was Ham's after that. The humor and point of his jokes were irrepressible, and people laughed until great, big tears rolled down their cheeks. Story upon story was told, illustrating some point and carrying it home to his hearers.

It is impossible to give any idea of his inimitable fun, and in order to believe one must see and hear. The latter part of his lecture was as eloquent as the first portion was funny. His audience was delighted with its beauty and moved with its eloquence. He is equally at home when he sours as when he makes his audience roar.

Col. Ham will be at the Opera House in Marion next Monday night.

#### NOTICE.

TO THE DEMOCRATIC COUNTY COMMITTEE:

I hereby notify and request every Democratic committeeman to meet me in Marion Monday, March 12, 1894, it being county court day. The business before the committee will be to reorganize, and I impress it upon every chairman of voting precinct committees to be present and see to it that every member of his committee is present also.

Very respectfully,

R. L. Moore, Ch'n,

Dem. Co. Committee.

#### A Hoop Factory.

Berry F. James & Sons will shortly put up a hoop factory in Marion. They will use a great deal of timber that for other purposes is practically worthless.

#### Ben Johnson Dead.

Ben Johnson, a well known and useful citizen of the Shady Grove neighborhood, died at his home Saturday.

An infant of Smith James near town died Friday.

#### A SAFE CRACKED.

Burglars Get Sixty Dollars From F. E. Robertson & Co's Safe.

Tuesday night burglars prized the shutter from a window of F. E. Robertson & Co's safe room, raised the window sash, carried away \$60 in cash and a lot of valuable papers. A large monkey wrench, a chisel, brace and bit were the tools used, and powder or some other explosive assisted in shattering the lock to the small Hall safe. The knob or handle by which the lock is turned, was evidently first knocked off, and the explosive was inserted in the aperture made by the displacement of the knob, and the explosion so completely shattered the lock and combination that the door was easily removed, with the assistance of tools found there. A pair of pants were also found, having possibly been used to deaden the sound. As Mr. Robertson did not go to the safe room until 8 or 9 o'clock Wednesday morning, the burglars had several hours to get away, and there is no trace of them whatever.

#### THE SCHOOL BOARD.

The Bonds to be Placed on the Market.

Tuesday the school board held a meeting and decided to proceed at once with the necessary arrangements for building an \$8,000 graded school building this summer. The decision of Superintendent of Public Instruction, Thompson, concerning the site was accepted as final, and the new house will be built upon the lot occupied by the old school buildings. The bonds will be issued in denominations of \$100 and are to run fifteen years; the board to have the option of paying them, any part thereof after five years; the bonds will be offered for sale publicly in lots, and as a whole on the first day of Circuit Court.

In the meantime plans and specifications for the new building will be prepared and it is expected that matters will be far enough advanced to begin work on the buildings by the 15th of May.

#### TWO DEATHS.

A Son and Daughter of J. H. Trimble Die.

Carrsville, Ky., Feb. 28.—On last Monday Mr. J. H. Trimble, a good citizen who lives near Carrsville, was summoned to Carlisle county by the illness of his daughter, Mrs. W. L. Thompson; she died and the body was brought to Galewood for burial: on the evening of the day Mr. Trimble left home, a dispatch came telling of the serious illness of his son at Dallas, Tex., two of his sons left immediately for Texas; one Tuesday morning a telegram came announcing the death of his son at Dallas. Mr. Trimble is one of our best citizens, and he has the sympathy of our people in this great bereavement.

About two months ago Mr. Bird left Carrsville for Island 26 in the Mississippi, two weeks ago his wife returned, he having died, and on yesterday morning the woman died.

#### Uncle Amos Dead.

On the 27th "Uncle" Amos Woods, one of the old time, old style negroes, died at his home in this county at the age of 84 years. He was an honest, industrious old man, one that had the respect of his own people as well as that of the white folks who knew him. He was raised by the late Henry Woods, father of our county clerk, and to the day of his death was strongly attached to the members of the Woods family.

#### Marriage Licenses.

Stonewall W. Simpson and Miss Mary F. Ford.

Joseph C. Lindsey and Miss Katie Pauls.

A. F. Franklin and Miss E. L. Summers.

Melvin G. Chapel and Miss Mattie Collins.

Wm. T. Jones and Miss Nina O. Clark.

#### Suits Filed.

J. H. Kirkham sues J. C. Funkhouser on a note for \$79.

Mrs. M. E. Peek and Thomas Peek sue the administrator of Levi C. Fraser for \$175.95, claimed to be a balance due M. E. Peek, formerly M. E. Lear, for services as housekeeper for the defendant, from April 1886 to March 1890.

#### County Court Notes.

By agreement Geo. D. Koont apprentice of S. C. Bennett, was released from the custody of his master.

J. W. Custard granted change in public road, and Ed Cridler appointed to have said road opened.

#### Deeds Recorded.

W. L. Bigham to Pierce & Son, 63 acres for \$1,575.

N. E. and John Griffin to W. H. Mayes, lot in Dycusburg for \$75.

A question that one meets with pretty frequently now-a-days is: "Will Dave Woods be a candidate for re-election?"

#### THEY WANT SOME PIE.

The Colored Voters Want Two of Their Number on the County Ticket.

In accordance with a call recently issued, the colored voters of Crittenden county held a meeting in Marion Monday. Previous to the hour of meeting a Press representative called upon one of the men interested in the meeting and asked if a reporter would be admitted, he was informed that the meeting would be held with closed doors, and that no white man need apply; that the Press must get its information from the best source it could, and that after the meeting there might be some news floating around. The meeting was held in one of the colored churches, and Phil. Johnson, of this place, was chosen chairman and Toney Hughes, of Fords Ferry precinct, Secretary. After adjournment, the Press called upon the chairman for information; he was pleasant and communicative. He said there were some fifty colored voters present, every precinct in the county except Dycusburg, being represented. "We were simply organizing to ask for a substantial recognition from the Republican party of Crittenden county. I understand there are 300 or 400 colored voters in the county. For 26 years we have been voting with the party, and now the sentiment of the colored voters of the county is that the time has arrived for us to have representatives on the ticket. We selected R. C. Wadell for Assessor, Harry Stone for Jailer, and will ask the Republicans to put them on the ticket. These men are qualified for the places, and with us this is no funny game. We are in cold earnest. We mean business. This thing was agitated to some extent four years ago, but the time was not then ripe; we asked for representatives on the county committee with this end in view. We are not going to back down; it is the feeling of our people to push the thing to a conclusion this time, and if there is any compromise it must be a compromise to our advantage."

#### MORE COAL FOUND.

A Five Foot Vein of No. 11 on Marion Ford's Farm.

Every now and then the presence of a vein of coal is discovered in some locality of the county. Last year the Springs excited considerable interest in the west side of the county; a few weeks ago, coal was found two miles east of Marion, and now in the extreme eastern portion of the county, the prospects for a paying mine are flattering, and the people of that vicinity who have been hauling coal from Providence, eight to twelve miles away, are elated over the idea of getting coal of the same quality practically at their own doors. The newly discovered vein is on the farm of Marion Ford, four miles from Shady Grove. The investigation so far shows a vein 4 feet and six inches thick, and of good quality. It is only a few feet below the surface, and can be mined at a small expense. The miners who are opening the vein, pronounce it identically the same coal mined at Providence. A thorough investigation will be made of the situation, and if as good as the surroundings now indicate, parties will take hold of the new mines under a two years contract.

#### Franklin-Summers.

Tuesday evening at the residence of George Summers, of the Levia neighborhood, Miss Lake Summers and Mr. A. F. Franklin were happily united in marriage, Rev. J. S. Henry officiating. Quite a number of the friends of both families were present. After the ceremony a handsome collation was served, and the happy pair were warmly congratulated. The bride is a handsome, and well educated young lady, admired for her lovely disposition; the groom is one of the popular, prosperous young farmers of the county. The Press extends congratulations.

#### An Expensive Drunk.

John Turpin came to town yesterday and by some means permitted fighting liquor to get charge of his right arm and tongue. At the depot he undertook to use his knife upon people in general. He said "guilty," when before Judge Moore and the bill was \$15.50.

#### Special Services.

Sermon for young people, especially for young men, at Presbyterian church Sunday evening. Text: "Is the young man safe?"

#### Notice.

The stock holders of the Marion Creamery are requested to meet at the creamery building Saturday March 10, 1894, at 2 p. m. Important business demands the attendance of all.

#### P. E. Shoemaker, Pres.

"What's the news in the Dycusburg country," was asked John Guess yesterday; "We are about done burning plant beds, and there are lots of them," was his reply.

#### RESCUED HER.

A Negro Girl's Lover Kills Her Assailant.

The following from the Evansville Courier is given to our readers for what is worth, we advise that it be taken with a copious supply of salt. Henderson, Ky., February 27.—A criminal tramp was killed Sunday last in Tradewater bottom, Crittenden county, where Abner Ford, a worthy negro, with a wife and daughter, Susie, aged 19, cultivate a small farm. At 9 o'clock a. m., during a high snow storm, the old couple went to visit a dying neighbor, leaving the young woman at home to prepare dinner. About 10 o'clock Susie went to the barn to collect some eggs and soon her piercing screams attracted Clem Simpson, a mulatto admirer of the girl, who chanced to be near by on a rabbit hunt. He hurried to the barn and looking through a chink beheld the scene which compelled him to fire at close range a load of shot into the body of the villain. Then clubbing his gun, Clem rushed through the door but found his victim dead. He carried the inebriated girl in his arms to the dwelling. The tramp was a white man about thirty-five, with nothing to indicate his identity save the tattooed letters "H. W." on his left fore arm.

#### PERSONAL.

Mrs. J. E. Dean is quite sick.

Prewett Cook returned from Ohio a few days since.

Miss Elviah Cridler is visiting friends in Caldwell county.

Mr. M. L. Hays, of Paducah, was in town yesterday.

Mr. W. L. Bigham is in Hopkinsville this week.

Miss Fannie Blue was the guest of friends in Princeton the first of the week.

Mrs. H. T. Flanary and children returned from Jonesboro, Ark., Sunday.

Miss Mollie Morris, of Kuttawa, has been the guest of J. F. Loyd's family.

Mr. W. B. Carnahan is at Fords Ferry. He likes that place as a residence.

Rev. Joe W. Love, of Morganfield, was hunting up his old friends in Marion Tuesday.

Mrs. J. W. Bigham, who came to attend the funeral of her father, returned home yesterday.

Hon. John W. Blue went to Frankfort yesterday to argue some cases before the Court of Appeals.

Miss Lucy Johnson, of Ft. Worth, Texas, paid her brother, J. W. Johnson, of Marion, a visit this week.

Mr. H. W. McKee, the tireless farmer and all wool and a yard wide Democrat of the Piney country, was in town yesterday.

Joiah Conger is shaping his business with a view of going west. He is cogitating over the glories of a home in Southern California.

John Casner and W. E. Todd, of Shady Grove, were in town Tuesday on a trading expedition, and Marion Ford came over to mill.

Messrs. Tom McConnell and A. F. Wolf, of Iron Hill, were in town Tuesday. They are the "procurators" of their school district, and are worried and being worried by necessary charts, globes, etc.

Since retiring from the active pursuits of life, Mr. J. N. Woods has improved in health, and his buoyant spirits, cheery disposition and great fund of information unite in making him one of the most interesting men one finds, nowadays.

Capt. Kennedy, the conductor on the O. V. line, was badly hurt Tuesday morning. While coupling cars between Morganfield and Harding Station he was caught between the bumpers of two cars. He was taken to Henderson and at last accounts was in a fair way to recover.

#### 10,000.

Hogs saved with B. A. Thomas' hog powders and stock food, sold by H. K. Woods, Marion, Ky., and J. P. Deboe & Co., Crayneville, Ky.

#### Specimen Cases.

S. H. Clifford, New Cassel, Wis., was troubled with neuralgia and rheumatism, his stomach was disordered, his liver was affected to an alarming degree, appetite fell away, and he was terribly reduced in flesh and strength. Three bottles of Electric Bitters cured him.

Edward Shepherd, Harrisburg, Ill., had a running sore on his leg of eight years standing. Used three bottles of Electric Bitters and seven boxes of Bucklen's Arnica Salve, and his leg is sound and well. John Speaker, Catwaha, O., had five large fever sores on his leg, doctors said he was incurable. One bottle Electric Bitters and one box Bucklen's Arnica Salve cured him entirely. Sold by H. K. Woods.

COFFINS,

COFFINS,

**SENSIBLE HINTS.**

Don't complain About the weather  
For easier life, try to make your mind to weather  
Than weather to your mind.

Don't complain About "the sermon"  
And show your lack of wit.  
For, like a boot, a sermon hurts  
The closer it doth fit.

Don't complain About your neighbor,  
For in your neighbor's view  
His neighbor is not faultless—  
That neighbor being you.

—Exchange.

**Fashions of the Ainus.**  
A description of the clothing worn  
in cold weather by the hairy Ainus, those  
strange little inhabitants of farther Si-  
beria and a part of Japan, is as follows:  
The only material of which they ever  
have a complete suit is fishskin. Such a  
suit is sometimes elaborately though  
coarsely embroidered. The resemblance  
between this embroidery and that of the  
North American Indians is remarkable.  
How the fishskin is prepared is still a  
puzzle to me. Though pretty thin, it is  
very tough and has more pliability than  
might be thought possible. Shoes even  
are made with it, but not exclusively of  
it. It generally forms the lining of the  
upper.

The thicker clothing is grotesqueness  
itself. For medium garments, especially  
for the covering of the back and chest,  
birch bark is used, other materials being  
etched to it. For the coldest weather  
the clothing is much like that of the  
Eskimos and the Kachitades. The  
grotesqueness of it arises not so much  
from its shape as from the variety of the  
materials.

In one of these Joseph's coat dresses  
were mixed patches of sable, bear, deer  
and foxskins, including the tails, in hap-  
hazard fragments, while behind and be-  
hind there was underneath all these a  
large piece of birch bark. The bark, I  
afterward found, was intended incident-  
ally as a protection against accidental  
shots from poisoned arrows which the  
Ainus use more in winter than in sum-  
mer in their hunting excursions.—  
Youth's Companion.

**A Legal Puzzle.**  
Curious comments by a judge, even in  
the presence of the prisoner, though ex-  
tremely rare, are not unprecedented.  
Mr. Justice Maule once addressed a phe-  
nomenon of innocence in a smoke shop  
in the following words: "Prisoner at the  
bar, your counsel thinks you innocent;  
the counsel for the prosecution thinks  
you innocent; I think you innocent. But  
a jury of your own countrymen, in the  
exercise of such common sense as they  
possess, which does not seem to be much,  
have found you guilty, and it remains  
that I shall pass upon you the sentence  
of the law. That sentence is that you be  
kept in imprisonment for one day, and  
as that day was yesterday you may now  
go about your business."

The unfortunate rustic, rather scared,  
went about his business, but thought  
law was an uncommonly puzzling busi-  
ness.—London Tit-Bits.

**Disappearing From Spain.**  
Naturalists have noticed the gradual  
disappearance from Spain during the  
last half century of certain mammalian  
fauna which have long been familiar to  
the Iberian peninsula. The porcupine,  
which was common in Andalusia and  
Estramadura 50 years ago, has now en-  
tirely disappeared from those regions. It  
is still to be found in Algeria and Mo-  
rocco, and the lemming, or muskshrew,  
which was once so very common and  
was the great favorite of all Spaniards  
before the introduction of the domestic  
cat, is now extremely rare. The Barbary  
ape, too, which is now only to be found  
in Gibraltar, where it is maintained  
with the greatest difficulty, was once  
very common in Spain.—London Globe.

**Train and Cannon Ball Compared.**  
If you will sit down and figure on the  
subject a little while, you will express  
less wonder when you hear of the next  
"head end collision" smashed thing up.  
A train running 75 miles an hour  
moves along at the rate of 110 feet per  
second and exerts an energy equal to 400  
tons. In other words, the energy exerted  
is nearly twice as great as that shown  
by a 2,000 pound shot fired from a 100  
ton Armstrong gun!—St. Louis Globe-  
Democrat.

**Where Cold Snaps Are Rare.**  
Whenever a cold snap visits Fort My-  
ers, far down in subtropical Florida, the  
inhabitants, who have no method of heat-  
ing their houses, come out into the streets  
and keep warm by sitting around great  
fires of wood. The cold snaps are rare,  
but when they come everybody, even the  
northern visitor, is thoroughly un-  
comfortable, and poor folks, with few and  
thin garments, really suffer.—Chicago  
Tribune.

A magnet which the great Sir Isaac  
Newton was as a net in his finger ring  
is said to have been capable of raising  
746 grains, or about 250 times its own  
weight of 3 grains, and to have been much  
diminished in consequence of the phenom-  
enal power.

A poor chance well used is better than  
a good chance poorly used. Service, not  
size of opportunity, is the thing which  
will enter into your final reward. Many  
a man is losing his opportunity by lazily  
longing for a large one.

The population of what is known tech-  
nically as the "city" of London reaches  
801,384 by day, but drops to 37,896 at  
night. The population of "greater" London  
is 5,635,805.

The two highest inhabited spots on  
earth are Aravichary and Mungata,  
mining camps in the Andes. The former  
has an elevation of 19,000 feet.

KING ALEXANDER OF SERBIA.

Serbia is in a political turmoil and it looks as though Alexander, the boy  
king, might soon find his occupation gone. He is only 17 years of age and is  
the son of ex-King Milan and ex-Queen Natalie, whose domestic infelicity has  
so often been the subject of newspaper comment.

**Talmage Was Thorough.**

The following is told by Boniface De Witt of the Riggs House:

"Dr. Talmage was preaching at Belle-  
ville, N. J., some years ago, and one  
week he made up his mind to go into the  
pulpit the next Sunday without notes or  
memoranda of what he was going to say.  
He memorized his sermon and believed  
he had it completely at his tongue's end.  
So Sunday night he went to the church  
pretty well fortified with confidence.  
"In those days in that section of Jer-  
sey churches and hotels and many pri-  
vate residences were equipped with  
gas machines, and the church where  
Talmage was to hold forth had one too.  
When he got into the pulpit after con-  
ducting the preliminary services all  
right, he gave out his text. Then he was  
horribly startled to find that he couldn't think  
of a thing to say. He repeated the text a  
second time, and yet his ideas failed to  
come. He was in agony and began  
slowly and impressively to announce his  
text a third time. As he reached the  
last word and the perspiration of dread  
and shame was beginning to start, the  
gas went out and plunged the place into  
utter darkness. There was no other  
means for lighting the office, and when  
it was announced that the gas machine  
had broken down hopelessly Dr. Tal-  
mage pronounced the benediction, and I  
have heard him say that he never did so  
before or since with greater fervor or  
thankfulness of spirit."—Washington Post.

**Certain Analogies.**

Molting has its analogy throughout  
the animal kingdom. We indeed molting  
invisibly, are continuously shedding our  
scales, but there are some animals that  
get through this process even more quick-  
ly than do birds—as, for instance, the  
shedding of the skin as a whole by the  
newt, eel and snake.

Sir James Paget has noted that some  
people have a few extra long hairs grow-  
ing out from the general mass of the  
eyebrows. The few long hairs are repre-  
sentatives of a permanent condition in  
the chimpanzee and some labrets. They  
grow out separately from the general  
hairy mass over the superciliary ridges.

Darwin notes as a significant fact that  
the palms of the hands and the soles of  
the feet of man are quite unkered, like  
the inferior surfaces of all four ex-  
tremities in most of the lower animals.

Something about the ear: The lobule  
of the ear is peculiar to man. There is,  
however, a rudiment of it in the gorilla.  
Happy gorilla—and man!

About the brain of man and ape: The  
whole comparison is one of degree, and  
in the case of the bushman's brain with  
that of a well developed ape the com-  
parison becomes nearly equal. In truth,  
there are no specific distinctions between  
the brain of the ape and that of man.  
Gentleman's Magazine.

**Persevering.**

Of the 36 women who, under the lead-  
ership of Miss Annette Daisy, made a  
run into the Cherokee strip when it was  
opened last September, 22 have persevered  
in their undertaking and are now  
hauling the lumber themselves for a  
house of 15 rooms, which they will occu-  
py. Their possession of 48 acres is well  
watered and timbered. They already have  
three teams, two cows, chickens and  
other stock, and, neatly dressed in short  
skirts that come just below the knee and  
are not by heavy woolen leggings that  
cover the legs from knee to ankle, they  
appear ready for all the farming opera-  
tions their pioneer enterprise involves.—  
Chicago Times.

**Keep Both Sides.**

Never condemn your neighbor un-  
heard, however many the accusations  
which may be preferred against him.  
Every story has two ways of being told,  
and justice requires that you should hear  
the defense as well as the accusation, and  
remember that the malignity of enemies  
may place you in a similar predicament.  
—New York Ledger.

**What the French Call Dry Scouring—**

that is, rubbing a bare floor with dry  
brushes—is far more effective than might  
be imagined.

**WHEN FRUIT FREEZES.**

Why Oranges Are Able to Resist Frost to an Unusual Degree.

The late Professor Newberry of Co-  
lumbia college, New York, showed re-  
cently some years ago how oranges  
and apples are able to resist frost to an  
unusual degree. His explanation is es-  
pecially interesting to every citrus fruit  
grower.

The professor showed that it is a law  
of crystallization or freezing or solidify-  
ing that this process depends upon sev-  
eral conditions of the liquid to be crys-  
tallized or frozen, by which is meant sim-  
ply that the liquid is changed into a solid.  
The effect of crystallization has much to do  
with it, as this itself reduces the tempera-  
ture of liquid to a considerable extent,  
as may be discovered by any person who  
will pour a little ether in his hand and  
blow upon it, when the greatly increased  
coldness will be felt. In cold water is  
frozen by exposing it in porous jars to  
the cold night winds when the tempera-  
ture of the air is several degrees above  
the freezing point.

Ice may be formed in a red-hot cruci-  
ble by the sudden evaporation of liquid  
carbonic acid or in a saucer under the re-  
ceiver of an air pump by the evaporation  
of it and the rapid absorption of the va-  
por that escapes by reason of the reduced  
pressure by sulphuric acid in another  
saucer.

Again, solutions of various substances,  
as sugar and crystallized salts, will not  
freeze at the ordinary temperature at  
which ice is formed in pure water. Thus  
a solution of salt requires a lower tem-  
perature to become frozen than fresh  
water does, and it is well known that  
sugar sirup can hardly be frozen at an  
ordinary temperature. Further, the ten-  
sion under which liquids are held has an  
effect in the same way. A light tension  
makes freezing easier, while a high one  
retards the congelation.

Now, all these facts have a bearing in  
the case of oranges and other fruits, as  
well as the sap of trees. Watery sap of  
very ancient plants freezes much more  
easily than the sweet and dense sap of  
the maple or the lily. Some liquids  
will resist freezing quite stubbornly at a  
very low temperature, and the resins  
covering of the buds scales of trees, as  
those of the horse chestnut, exert a great  
resistance to freezing.

The sap or juice of the orange contains  
a large quantity of citric acid in solu-  
tion, and a low temperature is required  
to congelate such a solution. It also con-  
tains considerable sugar, and this tends  
to resist cold. The sap or juice, which  
contains in it a large amount of citric  
78 per cent in the orange, is under a  
considerable tension, and this exerts some  
resistance to freezing, and finally the  
sap is not exposed to evaporation be-  
cause of its tight covering by which it is  
retained.

Thus an orange must be exposed to a  
lower temperature than the ordinary  
freezing point of water before it will  
freeze. The same applies to other fruits,  
as apples and peaches and potatoes, to  
some extent.—Fonoma (Cal.) Progress.

A western judge was listening to an  
attorney who had a mean habit of inter-  
polating remarks into the proceedings of  
the court. What he said was scarcely  
ever heard by any one, as he mumbled  
rather than spoke and would never re-  
spond to a remark. One day he said some-  
thing which nobody heard except the  
judge, who at once became exceedingly  
angry. Turning to the court bailiff, he  
thundered out, "Adjourn this court!"  
Then, as soon as the bailiff had done his  
duty, the judge stepped from the bench,  
and entered the clerk's office. The law-  
yer went along. So did two or three  
other people.

As soon as the judge got fairly into  
the room, he seized a lawbook, and turn-  
ing upon the lawyer he fairly screamed:  
"I was on the bench while you were  
insulting me. I was a judge then, I am  
a man now, and the man will have an  
apology for the judge, or he will take it  
out of your hide. You might make an  
apology to the judge, but you would not  
mean it. Now, however, the case is  
more serious, and unless you give me  
what I ask I will smash your head."

The lawyer made a most abject apology,  
which the judge accepted, and then the  
party went back to the courtroom and  
resumed business.—San Francisco Argon-  
aut.

**A Relentless Hyena.**

A well known Austin gentleman found  
himself in a very embarrassing position.  
He had left his money at home and not  
a nickel or a car ticket could he find  
in his clothing. He was about to leave  
the hotel car when a gentleman, a real  
gentleman, tendered him a nickel. He gladly  
accepted it and dropped it into the box.  
The grateful party then shook his un-  
known benefactor's hand, thanking him  
for the confidence and accommodation, and  
asked his address so he could return the  
money.

"Never mind," responded the gen-  
tlemen man, "it's a counterfeit anyhow.  
The street car company will make that  
bound of a driver redeem it. I've got  
apart of it. He is the scoundrel I am  
after. He has trifled with the affec-  
tions of a female relative of mine, and  
this will show him what kind of a relent-  
less hyena I am when my blood is up."  
—Texas Sittings.

**An Astute Policeman.**

Chicago Official—I have proof that you  
saw a man on the streets after 1 o'clock  
and neglected to question him.  
Policeman—No, but I followed him,  
saw him enter a house and five minutes  
after heard a shrill female voice giving  
him Hall Columbia for being out so late,  
and so I knew he was a respectable citi-  
zen.—New York Weekly.

**Memory of Sleep Walkers.**

The memory of sleep walkers is ex-  
traordinary, not to say phenomenal, es-  
pecially when under the peculiar impulse  
of the disease which prompts their move-  
ments. Moritz gives an instance of a  
poor basket maker who was unable to  
either read or write, yet, strange as it  
may appear, when in one of his somnab-  
ulistic vigils he would preach fluent  
sermons, some of which were recognized  
as having formed parts of discourses  
which he was accustomed to hear when  
he was a child attending his parish  
church, 40 years before.

**Introduction of Envelopes.**

The late Henry L. Lipman of Phila-  
delphia gives this interesting statement  
regarding the early use of envelopes in  
this country: "About 1842 unguined en-  
velopes made their first appearance as a  
new importation from France and I was  
the first to begin their manufacture in  
this country. Shortly afterward I im-  
proved them by adding gum to the flaps,  
and the gummed envelopes I made were  
the first which had been seen elsewhere,  
and the first envelopes of any kind used  
by the United States government were  
made by me. The demand at first was  
very small. Envelopes were as difficult  
to introduce as any new invention or im-  
provement is at the present time, and  
they were considered only as a tempo-  
rary fad which would soon go out of  
fashion again. That is the reason I did  
not patent or push them very hard, es-  
pecially as I had a good trade in seals and  
sealing wax and feared that envelopes  
would interfere with them. At first  
they were only used for business pur-  
poses, and it was some time before they  
were employed in social correspondence,  
as a person was considered lacking in re-  
spect to a friend who failed to lick the  
gum on the envelope sent him. I also  
made the first mailings known in the  
United States, and when postage stamps  
were introduced the contractor had to  
come to me to learn how the gum was  
made, and I gave him the information  
gratis."

**He Could Not Hear the Drops.**

"I saw an amusing experiment," said  
Henry Waller of the Hawkesville (Ga.)  
Daily News, recently published the fol-  
lowing notice: "We have a fine, gentle,  
family horse that we are using to ex-  
change for a good possum dog or a rea-  
sonable amount of fish bait. There is  
positively nothing wrong with the horse  
but his voracious appetite. We have  
had him with us now about two weeks,  
and he has eaten up three loads of cy-  
press shingles, two lot gates, licked the  
bottom out of a cast iron sugar kettle  
and commenced on the gable end of our  
residence, and the fact is we have just  
lost him to a swamper, or kill or be have  
house or home."

**A Family Hero.**

The editor of the Hawkinsville (Ga.)  
Daily News recently published the fol-  
lowing notice: "We have a fine, gentle,  
family horse that we are using to ex-  
change for a good possum dog or a rea-  
sonable amount of fish bait. There is  
positively nothing wrong with the horse  
but his voracious appetite. We have  
had him with us now about two weeks,  
and he has eaten up three loads of cy-  
press shingles, two lot gates, licked the  
bottom out of a cast iron sugar kettle  
and commenced on the gable end of our  
residence, and the fact is we have just  
lost him to a swamper, or kill or be have  
house or home."

YOU and Your Children

It is a wonderful remedy, which is alike benefi-  
cial to you and your children. Such is Scott's Emulsion  
of Pure Norwegian Cod Liver Oil and Hypophos-  
phites of Lime and Soda. It checks wasting in the  
children and produces sound, healthy flesh. It keeps  
them from taking cold and it will do the same for you

Scott's Emulsion

Scott's Emulsion cures Coughs, Colds, Consumption, Scrofula and all Anemic and Wasting Diseases. Prevents wasting in children. Almost as palatable as milk. Get only the genuine. Prepared by Scott & Bown, Chemists, New York. Sold by all Druggists.

CLAIRETTE SOAP

IN Hard or Soft Water  
this Soap works so well, that  
Women want NO OTHER.

YES. If You Want YES.  
THE MOST FOR YOUR MONEY  
Take the JOURNAL OF AGRICULTURE.

It is a large, handsome 8-page paper in its 29th year. 3,000 columns a year of the choicest and most interesting reading matter, newly all original. Its cir-  
culation far exceeds other papers of its class. It is a distinct department, something  
for every member of the household, old or young. Editors are practical farmers.  
Unvarnished contributors. Contains the only correct and reliable Farmers' market  
report sent out from St. Louis. It is the "GREAT PRATICAL" and "MOST DESIR-  
ABLE" and the "GREATEST NEWS-PAPE" of any Farm Paper in the World.  
Send for specimen copies, mammoth Premium List for 1891, and full particulars  
of the Great \$200 Cash Prize Offer, ALL FREE, by dropping Postal Card to  
JOURNAL OF AGRICULTURE, St. Louis, Mo.
